Last Minute Resources

1. **Data Structures and Algorithms:** I have a really underrated gem. Go to dsarevision.com, click 'Download now' and you're all set!

2. **Object-Oriented Programming (OOP)**: Drink tea and learn from javatpoint :D

- C++: https://www.javatpoint.com/cpp-oops-concepts

- Java: https://www.javatpoint.com/java-oops-concepts

3. **Database Management System (DBMS):** Enough content to study tonight, another underrated gem for DBMS. https://www.studytonight.com/dbms/

4. **Operating System:** Back yet again**,** https://www.studytonight.com/operating-system/

5. **System Design:** Here comes the OG, you won't hunt for System Design resources ever! It's a very famous course freely available on GitHub ;)

- Low-level Design: https://github.com/tssovi/grokking-the-object-oriented-design-interview

- High-level Design: https://github.com/sharanyaa/grok_sdi_educative/blob/master/grok_system_design_interview.pdf

PS: Utilise this stuff a day before your interviews, ace them, and do let me know on Twitter at @tanyarajhans7. All the best!
